## Restaurant with view

Cava Drink & Restaurant's project comes from the customer's need for a versatile outdoor covering, able to increase the number of covered outdoor seats and to offer a proper shelter in any climatic condition. KE Outdoor Design suggested the Gennius family's newest addition, the pergola awning structure ISOLA 3. Isola 3 can be perfectly inserted into any architectural context, thanks to its strongest points: modularity, lines and profiles' lightness.

## Outfit your office!

A nickel-plated frame and four-star base makes the Meredith Meeting Chair an elegant and modern choice for conference seating. The chair's leather-like upholstery is stain-resistant and therefore easy to clean-perfect for conference rooms where catered lunches are served and spills are likely to happen.

## Dutch design

The Technova College in Ede, The Netherlands officially opened doors on October 18th. The new school building of the Regional Education Center ROC A12 offers space for the departments of Technology & Technology, Media & ICT and Sound & Vision. The new accommodation contains a mix of class rooms for theoretical and practice lessons and is a breeding ground for developments in technique. It is entirely focused on cooperation and interaction internally, but also with the regional business community.
