

## Introducing Crain's 100 Best Places to Work in 2019

*Crain's* is announcing its 2019 Best Places to Work in New York City. Put together in partnership with Best Companies Group, the feature involved surveys of more than 20,000 employees working in the five boroughs. Respondents answered a confidential survey covering topics such as working conditions, benefits and corporate culture. The results were evaluated alongside responses from a separate survey of employers. Once the surveys were delivered, the Best Companies Group's workplace assessment experts determined the qualifying companies, sorted them by the size of their local workforce and ranked them from the top rating on down.

The firms represented here span a range of industries, including consulting, engineering, finance, law and tech. [The final ranking of the 100 firms will be announced in December.](#)
